This application contains claims directed to the following patentably distinct species of the claimed invention:

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 11-12 are generic.

The applicants are respectfully requested to select an single species or single combination of species as set forth in the following claims:

1) Applicants are referred to original claim 3 with a Markusch list of all possible *thickening agents*. Applicants are respectfully requested to select a singles species or single combination of species for the thickening agent.

2) Applicants are referred to original claim 5 with a Markusch list of all possible *hydrophobing additives* including single species and combinations thereof. The applicants are respectfully requested to select a single species or single combination of species.

Applicants are respectfully requested to select a single species from thickening agents and hydrophobing additives to be responsive to this office action. The examiner regrets not combining this with the restriction but inadvertently did not place this into his restriction requirement and it is nevertheless required. Note also that Group II that was elected by applicants refers to "any of the preceding claims" in their preamble (see claim 11) and thus it was necessary to do an election requirement as well.

A telephone call was made to John Gresens on 3/14/05 but did not result in an election being made.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
